| Stereo Main | 3-4 ft into room | Large | Prometheus HO/T | For Tube, SET and OTL Amps |

Designer's Comments

Please note that it is the application and the placement constraints that best defines the correct loudspeaker to choose.

Small = 1000 cu ft (30 m3), Medium = 2000 cu ft (60m3), Large = 3000 cu ft (90m3), Very Large > 4000 cu ft (100m3).

All North Creek Music Systems' loudspeakers share very similar voicing, so they can be mixed and matched freely for specific placement requirements in most home theater systems. All North Creek loudspeakers can be ordered magnetically shielded.

To use a vented loudspeaker with subwoofer(s), the vent must be sealed with tightly rolled foam for the system to integrate properly.
